**PERFECT  
EUROPE!**

## We use

- Ecological carton fillers
- Recycled paper for printers
- Reusable tableware

## We avoid

- Cotton bags from countries with higher risk of workers and environment exploitation

## We look

- For new ways to be green at work
- For new green products and inspirations, everyday

## We support

- Employees in using bicycle to and from work

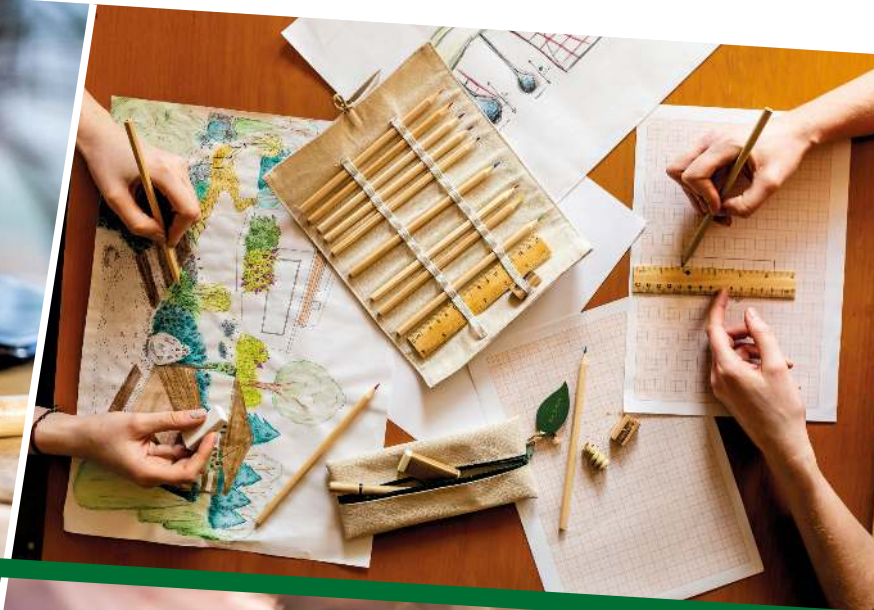

## We invite

- You to be green with us

# Natural materials

Products entirely or partially made of environmentally friendly materials such as: bamboo, wood, cotton, cardboard and biodegradable materials.

# Recycled materials

Whole products or parts made from recycled materials. Durable and stylish.

# Conscious lifestyle

Products that help to reduce our ecological footprint and support sustainable development. Reusable products, products made from environmentally friendly materials that use less energy and resources.

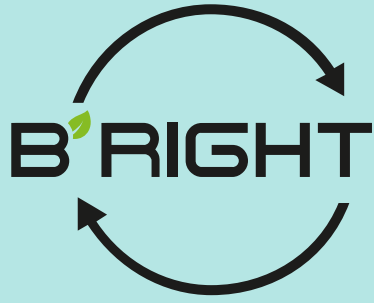

# Sustainable packaging

Products with a minimum packaging or a reusable one.

# Smart and world-friendly promotion

The collection for dynamic and independent people who value functionality and good design. Created to facilitate travel through everyday life.

**mauro conti**  
exclusive collection

# The elegant gift!

Elegance and unique design of high quality products give the promoted brand an exclusive image.

# Outdoor

pro-motion!

Functionality and style for outdoor activity lovers.  
Air Gifts means promotion that can work in all  
conditions.

# UV360

print on DRINKWARE

The newest technology UV360 is used to personalize all around cylindrical and conical shaped advertising products such as bottles and cups. This technique is most often used for printing on gadgets made of metal, plastic or glass, and its big advantage is very high printing resolution.

# RPET collection

**Did you know...**

NFC is a wireless form of data exchange that works over short distances. The chip can store information such as website address.

Zibee

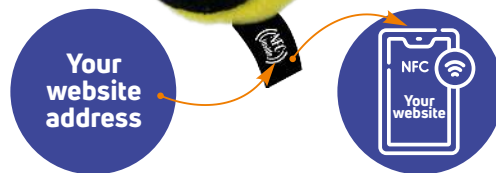

HE795-08

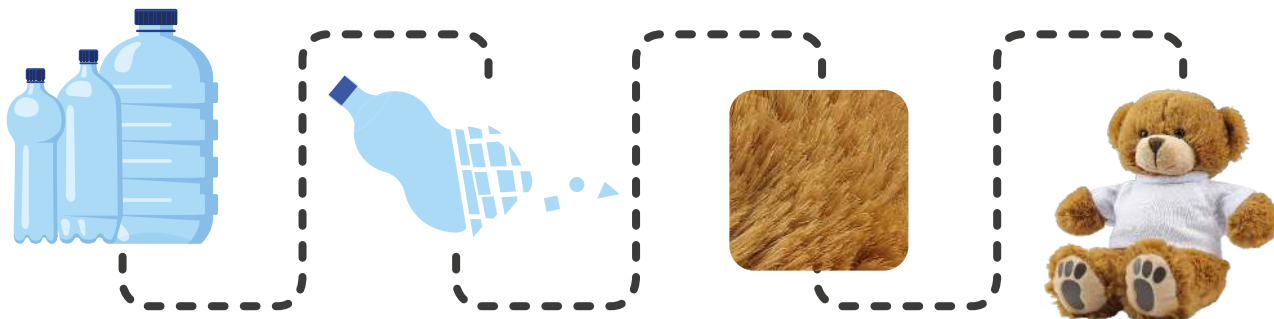

Bee made of plush from recycled PET bottles with NFC (Near Field Communication) chip inside the label, works with mobile devices with NFC technology, keyring. NFC is an international communication standard for wireless data exchange over short distances, e.g. link to the website address can be uploaded to the chip which can be read by mobile device with NFC technology after placing it near to the NFC logo on the label.

THE PRODUCTION PROCESS

# CUSTOMIZED PRODUCTION FROM A TO Z

Can I do it myself?

Sure, but check what it means!

Our hair turned silver, but our projects turn golden.

We lose our sight from fine print, but no details will slip through our fingers.

We are not detectives, but solving challenges is a piece of cake for us.

We are not gems experts, but we know how to find a real diamond in the rough in every project.

We are usually down to earth, but new projects let us spread our wings.

We're inflexible in negotiating the best offers with producers, but flexible to adapt to your needs.

We face all the complicated custom procedures, but we don't lose our heads.

KEEP CALM...  
AND LEAVE IT TO US

# PRINTING TECHNIQUES

## NEW TECHNIQUE

### UV360 | UV360 Print

The newest technology UV360 is used to personalize all around cylindrical and conical shaped advertising products such as bottles and cups. This technique is most often used for printing on gadgets made of metal, plastic or glass, and its big advantage is very high printing resolution.

### T | Tampo print

One of the most popular printing techniques used mainly for small objects made of different materials. Gives the possibility of placing small logos, obtaining good readability, it is also suitable for non-flat surfaces.

### TC | Hot stamping

Effective decorating technique applied mainly on leather products, PU, carton and paper. It uses a special mold to make a permanent stamp on the material. The final effect can be additionally refined by foil embossing.

### S | Screen print

Imprint method used on large and flat area. This method is an alternative to tampo print and it is used mainly to customize textiles and also items made of plastic, metal, glass and wood. Perfectly suited for one or multicolour printing.

### SL | Sublimation

Very durable customization technique used mainly for branding on white products. This method makes a logo reflection on the printing surface at a right temperature. Sublimation is most commonly used on polyester textiles and materials like ceramics with a special polyester coating intended for this method.

### L | Laser engraving

It is a durable and very precise decorating method. Perfect for marking metal, wood, cork, leather, PU and some plastics. The colour of logo or inscription depends on the material of the engraved product.

### D | Doming

Very effective decorating technique. The layer of transparent resin is applied on the digital quality printout, which results in deeper and more vivid colours. Resin also protects the imprint against mechanical damages, moisture and UV light, increasing the product's durability.

### TF | Heat transfer

Very durable imprint technique applied mainly on textiles (bags, backpacks, masks, first aid kits) but also on cardboard (notebook covers) and PU. The print is first made on a special foil or paper and then transferred by a press to the product surface using appropriate temperature. This technique offers the possibility of marking sharp edges. Printing can be made in colours from 1 to full colour.

### FC | UV digital print

Technology which enables printing in full colour on flat surfaces, in high resolution, with UV paints (CMYK + white), ensuring intense colours, perfect coverage and adhesion to the substrate.
