# DTF – Direct To Film

DTF (Direct To Film), is a technology of thermal transfer prints in FULL COLOUR, characterized by high quality and durability of the print.

The full range of colours and gradations are used for DTF transfer. Thanks to DTF we have possibility to imprint graphics of any shape, in high quality and in vivid colours.

The technology is perfect for personalization of:

- textiles,
- flat surfaces,
- other materials dedicated to ordinary transfer.

# UV360 print on DRINKWARE

The newest technology UV360 is used to personalize around cylindrical and conical shaped advertising products such as bottles and cups. This technique is most often used for printing on gadgets made of plastic, metal or glass, and its big advantage is its very high printing resolution.

# Drinkware

## INDOME V0901

Gift ball, container for gifts. Great as a Christmas tree ball, as container for cosmetics, sweets, fruits, compliant with regulations for products intended for contact with food. The unique surface design, with a geometric motif, creates interesting light reflections, and the flat base allows the product to stand by itself on a support. The hole in the upper part allows the attachment of a hanger, a decorative string or label (not included). There is the possibility to attach a decorative red ribbon [ribbon with hanger V0011-05 sold separately]. Registered design®

**NATHAN BROWN** HE261-56

Brown Christmas teddy bear in cap and scarf suitable for printing

plush, velour 12 cm TF, DTF  
3,76 EUR

# PRINTING TECHNIQUES

## NEW!

### DDC | Direct Digital CMYK

Affordable technique with a wide colour range, intended for low-cost multicoloured prints on absorbent surfaces. This personalisation technique does not use white underprinting. Print size does not affect the price.

## NEW!

### DTF | Direct to Film

Durable technique of thermal transfer prints in FULL COLOUR, characterized by its high quality. The full range of colours and gradations are used for DTF transfer. Possible to imprint graphics of any shape, in high quality and in vivid colours. The technology is perfect for personalization of textiles, flat surfaces and other materials dedicated to ordinary transfer.

## NEW! DTF + | DTF PLUS

A supplement to DTF enriched with one of the offered special effects: sparkling glitter, glowing in the dark or light-reflecting. Recommended for creative designs and to accentuate the print on the product.

## NEW! D | Doming NFC

It is a combination of a durable and effective printing technique with modern NFC (Near Field Communication) technology. Inscription with deep and vivid colours gives advertising gadgets an individual character, and thanks to the NFC chip it is possible to save data such as: website address, business card, video link or link to online promotional materials.

## NEW! UV360 | UV360 Print

Technique used to apply personalised print around cylindrical and conical shaped products, such as bottles and cups. This technique is most often used for printing on plastic, metal or glass. Its big advantage is its very high printing resolution.

## T | Tampo print

Technique used mainly for small objects made of different materials. Even small logos printed with this technique are sharp and clear with distinct edges. It is also suitable for non-flat surfaces.

## TC | Hot stamping

Effective technique applied mainly on leather products, PU and cardboard. It uses a special mold to make a permanent stamp on the material. The final effect can be additionally refined by foil embossing.

## S | Screen print

Imprint method perfectly suited for single or multicolour printing used on large and flat area. This method is used mainly with textiles as well as items made of plastic, metal, glass and wood.

## SL | Sublimation

Durable technique used on white products, polyester textiles and materials such as ceramics with a special polyester coating. The logo is printed with sublimation inks onto a special surface from where the imprint is transferred to the product using the right temperature.

## L | Laser engraving

Durable and very precise decorating method. Perfect for marking metal, wood, cork, leather, PU and some plastics. The colour of logo or inscription depends on the material of the engraved product.

## D | Doming

Effective decorating technique. The layer of transparent resin is applied on the digital quality printout, which results in deeper and more vivid colours. Resin also protects the imprint against mechanical damages, moisture and UV light, increasing the product's durability.

## TF | Heat transfer

Very durable imprint technique applied mainly on textiles but also on cardboard and PU. The print is made on a special foil or paper and is transferred by a press onto the product surface. It can be made in full colour.

## FC | UV digital print

Technique which enables printing in full colour on flat surfaces, in high resolution, with UV paints (CMYK + white), ensuring intense colours, perfect coverage and adhesion to the substrate.

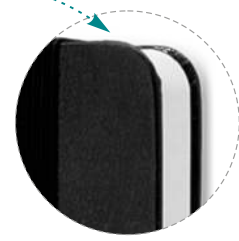

# M MOLESKINE

**MOLESKINE** is a legendary brand with a strong global presence. Brought back to life in 1997, now is one of the most recognizable and appreciated in the world. The brand values are founded on five pillars: culture, imagination, memory, personal identity and travel. MOLESKINE brand's history combined with timeless design and personalization, creates unique gifts for every occasion.
