UV360 print on DRINKWARE

UV360 technology is used to personalize all around cylindrical and conical shaped advertising products such as bottles and cups. This technique is most often used for printing on products made of plastic or metal, and its big advantage is a very high printing resolution.

PRINTING TECHNIQUES

NEW!

DDC | Direct Digital CMYK

Affordable technique with a wide colour range, intended for low-cost multicoloured prints on absorbent surfaces. This personalisation technique does not use underprinting making it especially suitable for use on white products. Print size does not affect the price.

DTF | Direct to Film

Durable technique of thermal transfer prints in FULL COLOUR, characterized by its high quality. The full range of colours and gradations are used for DTF transfer. Possible to imprint graphics of any shape, in high quality and in vivid colours. The technology is perfect for personalization of textiles, flat surfaces and other materials dedicated to ordinary transfer.

NEW! DTF + | Direct to Film PLUS

A supplement to DTF enriched with one of the offered special effects: sparkling glitter, glowing in the dark or light-reflecting. Recommended for creative designs and to accentuate the print on the product.

S | Screen print

Imprint method perfectly suited for single or multicolour printing used on large and flat area. This method is used mainly with textiles as well as items made of plastic, metal, glass and wood.

T | Tampo print

Technique used mainly for small objects made of different materials. Even small logos printed with this technique are sharp and clear with distinct edges. It is also suitable for non-flat surfaces.

L | Laser engraving

Durable and very precise decorating method. Perfect for marking metal, wood, cork, leather, PU and some plastics. The colour of logo or inscription depends on the material of the engraved product.

TF | Heat transfer

Very durable imprint technique applied mainly on textiles but also on cardboard and PU. The print is made on a special foil or paper and is transferred by a press onto the product surface. It can be made in full colour.

NEW! UV360 | UV360 Print

Technique used to apply personalised print around cylindrical and conical shaped products, such as bottles and cups. This technique is most often used for printing on plastic, metal or glass. Its big advantage is its very high printing resolution.

FC | UV digital print

Technique which enables printing in full colour on flat surfaces, in high resolution, with UV paints (CMYK + white), ensuring intense colours, perfect coverage and adhesion to the surface.

D | Doming NFC

It is a combination of a durable and effective printing technique with modern NFC (Near Field Communication) technology. Inscription with deep and vivid colours gives advertising gadgets an individual character, and thanks to the NFC chip it is possible to save data such as: website address, business card, video link, or link to online promotional materials.

D | Doming

Effective decorating technique. The layer of transparent resin is applied on the digital quality printout, which results in deeper and more vivid colours. Resin also protects the imprint against mechanical damages, moisture and UV light, increasing durability of the print.

SL | Sublimation

Durable technique used on white products, polyester textiles and materials such as ceramics with a special polyester coating. The logo is printed with sublimation inks onto a special surface from where the imprint is transferred to the product using the right temperature.

TC | Hot stamping

Effective technique applied mainly on leather products, PU and cardboard. It uses a special mold to make a permanent stamp on the material. The final effect can be additionally refined by foil embossing.

M MOLESKINE

MOLESKINE is a legendary brand with a strong global presence. Brought back to life in 1997, now is one of the most recognizable and appreciated in the world. The brand values are founded on five pillars: culture, imagination, memory, personal identity and travel. MOLESKINE brand's history combined with timeless design and personalization, creates unique gifts for every occasion.
